

OrangeHRM — Enterprise Test Execution & Quality Report

Application under test: OrangeHRM Open Source 5.7 • opensource-demo.orangehrmlive.com

Prepared by: **Abhishek — QA / Automation** • Report date: **18 Jul 2026** • Cycle 2 (Regression + Functional), 06–17 Jul 2026 • Overall status: **Conditional Pass**

1. Executive Summary

This report summarizes the quality assessment of the OrangeHRM web application covering ten functional modules across functional, regression, negative, UI/UX, cross-browser, and baseline security testing. Of the **187 test cases** designed, **175 were executed**, achieving a **pass rate of 86.9%** and **requirement coverage of 94%**. A total of **24 defects** were logged: **2 Critical**, **5 High**, 9 Medium, and 8 Low. The two Critical defects — a leave-balance data-integrity issue and a role-based access-control bypass — must be resolved before production sign-off.

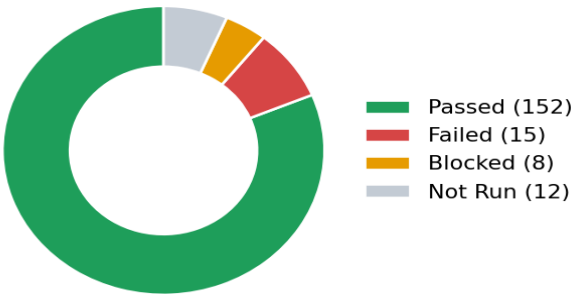

Recommendation — Conditional Go: the release may proceed once the 2 Critical and 3 open High-severity defects are fixed and re-verified. Remaining defects are acceptable for a fast-follow patch.

2. Quality Metrics at a Glance

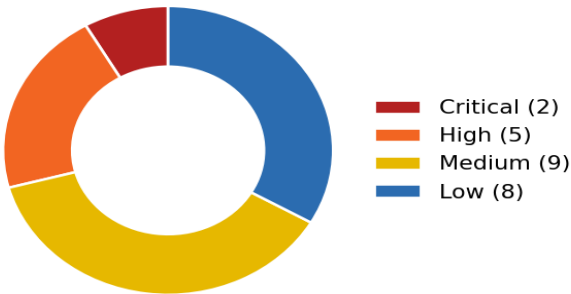

187	175	152	15 / 8	24	94%
Designed	Executed (93.6%)	Passed (86.9%)	Failed / Blocked	Defects	Req. Coverage

3. Visual Dashboard

Test Execution Outcome

Defects by Severity

Module-wise Execution

4. Scope & Test Strategy

In Scope	Approach & Environment
Login & Authentication (incl. forgot password, session handling); Admin — user management, job titles, organization setup; PIM — employee records, add/search/edit, reports; Leave — apply, approve, entitlements, balance calculation; Time — timesheets, attendance, project time tracking; Recruitment — vacancies, candidates, resume upload; My Info; Performance; Dashboard; Directory; Buzz.	Test types: Smoke, Functional, Regression, Negative, UI/UX, Cross-browser, baseline Security. Automation: Selenium WebDriver + TestNG (92 automated regression cases). Manual: Exploratory + scripted execution for new features and negative paths. Browsers: Chrome 138, Firefox 140, Edge 138 on Windows 11 (1920x1080 & 1366x768). Out of scope: Load/performance testing, mobile-native apps, penetration testing (recommended follow-up).

5. Module-wise Coverage & Results

Module	Designed	Executed	Passed	Failed	Blocked	Pass Rate
Login & Authentication	18	18	17	1	0	94.4%
Admin	26	25	22	2	1	88.0%
PIM (Employee Mgmt)	30	28	25	2	1	89.3%
Leave	28	26	21	3	2	80.8%
Time & Attendance	20	18	15	2	1	83.3%
Recruitment	24	22	19	2	1	86.4%
My Info	15	15	13	1	1	86.7%
Performance	12	10	8	1	1	80.0%
Dashboard & Directory	8	8	8	0	0	100.0%
Buzz	6	5	4	1	0	80.0%
Total	187	175	152	15	8	86.9%

6. Defect Summary

Total **24 defects** — **2 Critical**, **5 High**, 9 Medium, 8 Low. Status: 6 Open, 5 In Progress, 4 Fixed–Retest, 9 Closed. Top 12 defects listed; the remaining 12 are Low/Medium cosmetic and validation-message issues in the defect log.

ID	Title	Module	Severity	Status
BUG-001	Leave can be applied and approved with negative balance — corrupts entitlement data	Leave	Critical	Open
BUG-002	ESS-role user can access Admin module via direct URL (RBAC bypass)	Admin	Critical	Open
BUG-003	Employee search throws HTTP 500 when name contains special characters	PIM	High	In Progress
BUG-004	Resume upload accepts .exe and script files — no file-type validation	Recruitment	High	Open
BUG-005	No account lockout after repeated failed login attempts (brute-force exposure)	Login	High	In Progress
BUG-006	Timesheet weekly total miscalculated across DST boundary	Time	High	Fixed - Retest
BUG-007	Leave balance not recalculated after approved leave is cancelled	Leave	High	In Progress

ID	Title	Module	Severity	Status
BUG-008	Profile photo upload >1 MB fails silently with no user feedback	My Info	Medium	Open
BUG-009	Pagination resets applied filters on Job Titles list	Admin	Medium	Closed
BUG-010	Dashboard Quick Launch icons overlap at 1366x768 resolution	Dashboard	Medium	Fixed - Retest
BUG-011	Buzz post timestamps display UTC instead of user's local timezone	Buzz	Low	Open
BUG-012	Inconsistent button label casing across modules (Save / SAVE / save)	UI Global	Low	Closed

7. Key Risks & Recommendations

Risks	Recommendations
• Access control (BUG-002): ESS users can reach Admin URLs directly — privilege-escalation risk if shipped. • Data integrity (BUG-001): negative leave balances can be approved, corrupting payroll inputs. • Security hardening: no account lockout on failed logins; resume upload accepts executable files. • Blocked coverage: 8 cases blocked (Performance & Leave approvals) pending environment data fix.	• Fix & re-verify 2 Critical + 3 open High defects before release (exit-criteria gate). • Add server-side role checks on all Admin routes; whitelist file types on uploads. • Complete the 12 not-run cases in a 2-day supplementary cycle once blockers clear. • Expand automation from 92 to 130 cases to bring regression under 2 hours per run. • Schedule dedicated performance and penetration testing before major-version rollout.

8. Exit Criteria & Sign-off

Criterion	Target	Actual	Status
Test case execution	>= 95%	93.6%	At Risk
Pass rate	>= 90%	86.9%	At Risk
Requirement coverage	>= 90%	94%	Met
Open Critical defects	0	2	Not Met
Open High defects	<= 2	3	Not Met
Regression suite green	100%	100% (excl. known failures)	Met

Sign-off position: QA recommends **Conditional Go** — release gated on closure of BUG-001, BUG-002 and open High-severity items, followed by a focused re-test cycle (estimated 3 working days).
